

STEEL STRUCTURES

From design to installation.

Industrial steel structures to your drawings and
technical brief.

VERTICAL edition · September 2026

Business-area illustration.

A complete project or a defined stage.

VERTICAL engineers, fabricates and supplies industrial steel structures. Installation on site is carried out by its own team.

Engineering

Structural solutions, detailing, drawings and specifications.

Fabrication

Building frames, trusses, industrial structures and custom components.

Supply

Across Russia and overseas. Complete packages or phased shipments.

Installation

On-site assembly and installation by our own team.

Scope, schedule, documentation and responsibilities are defined for each project.

Shaped by your project.

From individual components to large-scale and space-frame systems. Specifications and configuration follow your design.

Building frames

Columns, beams, bracing and load-bearing frames.

Space-frame systems

Trusses, roof structures and lattice systems.

Industrial support structures

Elevated racks, support frames and access platforms.

Custom connections

Individual components to your drawings and specifications.

From the brief to workable solutions.

We develop structural solutions and detailing to your design inputs. Engineering scope and required documentation are agreed before work begins.

- Design inputs. Building purpose, loads, dimensions, operating conditions and technical requirements.
- Structural solutions. Structural arrangement, member sections, connections and splices aligned with the project.
- Detailing. Drawings, shipping pieces, connections, marks and specifications within the agreed scope.

Business-area illustration.

Your drawings. Finished structures.

We fabricate industrial steel structures to your drawings and technical requirements, from individual components to complete project batches.

- Component preparation. Materials, cutting, processing and holes to the project documentation.
- Assembly and welding. Connections and shipping pieces prepared with delivery and installation in mind.
- Inspection and protection. Materials, dimensions, joints, surface preparation and coating within the agreed scope.

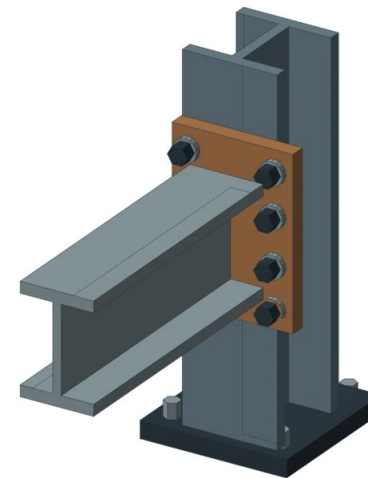

Business-area illustration.

Shipments aligned with your site schedule.

We coordinate batch preparation and supply to your project location, dimensions and work sequence, across Russia and to agreed international destinations.

- Batch preparation. Aligning the batch contents with installation phases and the agreed sequence.
- Packing and dispatch. Taking account of component dimensions, packing and acceptance requirements.
- International supply. Agreeing the delivery term, place or port, destination requirements and documents.

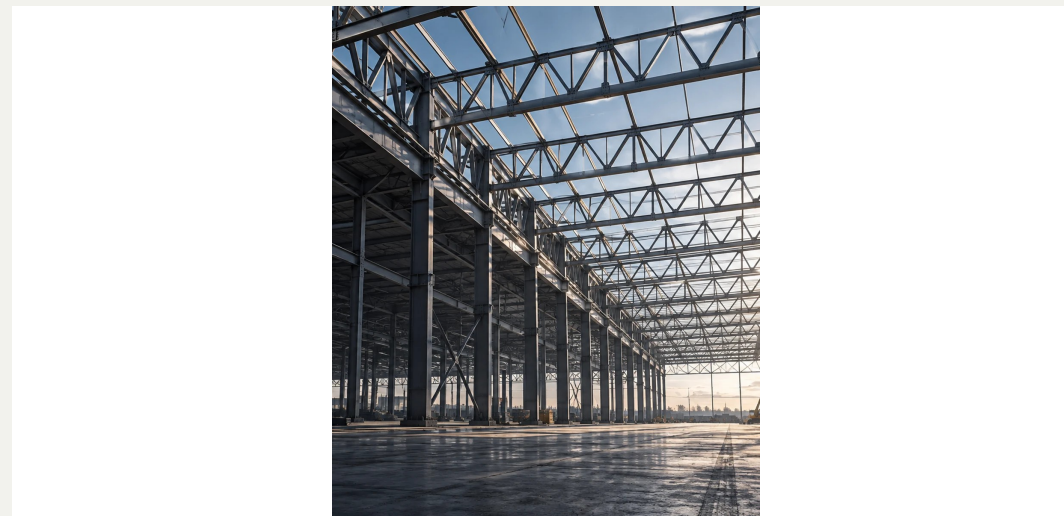

Business-area illustration.

Installed by our own team.

We carry out steel-structure assembly and installation on the client's site, as part of the full project scope or as a separately agreed stage.

- Preparation. Project documentation, site conditions, access, sequence and work schedule.
- Installation. Assembly and installation to the design, coordinated with shipments.
- Inspection and handover. Checking the completed work and providing the documentation specified in the contract.

Business-area illustration.

From project inputs to on-site delivery.

01**Review**

Drawings or brief,
quantities, delivery location
and installation scope.

02**Terms and
schedule**

Technical requirements,
phases, payment and
acceptance criteria.

03**Execution**

Engineering, fabrication,
shipments and installation
within the agreed scope.

04**Handover**

Technical and completion
documents, with accounting
support.

Urgent and phased enquiries are assessed against the available inputs. The schedule is confirmed after technical review.

Inputs for an initial quotation.

Drawings or brief

Available design, detailing, specifications or a description of the task.

Quantity and materials

Structure list, material grades and protective coatings.

Site and logistics

Location, dimensional restrictions, shipment sequence and installation needs.

Schedule and acceptance

Target dates, priorities, inspection and documentation requirements.

Include your company, tax ID, contact person and email in the enquiry.

Let us discuss your project.

Send the available inputs. We will clarify your requirements and agree the next steps.
